Inspired by the mystery of black holes, the Bond product line explores how gravity bends light and space, creating an ever-shifting interplay of illumination and shadow. Its reflective and translucent surfaces respond to their surroundings, transforming with the changing light of the day and the shifting seasons – constantly in motion, shaped by its environment.

Colours & Shapes

* Standard overall height of pendant (including cable) is 2500 mm / 98,43 in. The cable can be adjusted by shortening the wire.

** All glass components are handmade - exact dimensions & colour can vary slightly.
